

HAYWOOD'S HERITAGE MOMENT: OIL RIGS & MINING

The mineral barite is used to add weight to oil well drilling mud to keep oil in the drill hole and prevent oil from gushing out of the hole.
Source: USGS

GOLD RISES AFTER FED TEMPERS INTEREST RATE FORECAST

Playing down expectations of an interest rate rise in the short-term, the Federal Reserve's speech was reflective of a negative week in economic data in the U.S., translating to a depreciating dollar and rebound in precious metals prices. Major economic indicators including housing starts, industrial production and initial jobless claims were all negative, perhaps reflecting the harsh winter conditions in February/March that may have impacted economic activity. In her speech in Washington on Wednesday, Yellen stated that current interest rate policy "remains appropriate", and that the Fed is not likely to raise interest rates in April, and that any potential change in June would be dictated by economic data moving forward. In response, gold rose 2% to finish at \$1,182 per ounce on Friday, while silver (up 6.5%) and platinum (up 1.8%) were also up, finishing at \$16.74 and \$1,139 per ounce respectively. Palladium was down for the week (down 2.1%) finishing at \$777 per ounce. Base metals were a mixed bag this week, with copper (up 3.1%) and zinc (up 2.6%) closing at \$2.76 and \$0.93 per pound respectively, while nickel and lead both lost ground closing at \$6.45 and 0.81 per pound respectively. The UxC Broker Average Price (BAP) of uranium rose above the \$40 per pound mark on Wednesday, before dropping back to \$39.25 per pound on Friday. Finally, WTI crude prices continued to be highly volatile, almost falling to \$42 per barrel before recovering to finish the week at \$45.72 per barrel.

DIGGING IN...

- Metals Sector Macro:** Gold rises after Fed speech 2
- Junior Explorer: Weekly Vantage Point:** News from the Junior sector this week included drilling results from Pure Gold's (PGM-V) Madsen gold project in Ontario, Fission Uranium's (FCU-T) Patterson Lake South project in Saskatchewan, and NexGen Energy's (NXE-V) Rook 1 project also in Saskatchewan. 4
- Haywood Research: The Week in Review:** Publications from the Haywood Research team this week included financial results from RIO-T and BTO-T, a pre-feasibility study from KDX-T, a restructured gold stream for LGC-T, the completion of a 60% earn-in for PLG-T, a loan facility for COP-T, an amended 3-year credit facility for HBM-T, an update on U-T and a revised operating plan from EDR-T 7
- Market Essentials:** BHP Billiton (BHP-ASX) announce spin-off company, South32, will be launched in May 10

METALS SECTOR MACRO

Macroeconomic News

United States: The economic week started off with the release of the New York Federal Reserves' Empire Manufacturing index, which dropped to 6.9 in March, compared with a reading of 7.8 in February, well below analysts' expected reading of 8.0; the new orders index fell by 4 points to -2.4, while the shipments index declined 6 points to 7.9. In a separate report released on Monday, Industrial Production in the United States rose 0.1% in February, versus the consensus estimate of a 0.2% rise and stronger than January's disappointing downward revision to a 0.3% fall; capacity utilization was down to 78.9%, versus the 79.5% figure estimate. On Tuesday, the Department of Commerce said that U.S. housing starts dropped 17% month on month (MoM) in February to a seasonally adjusted annual rate of 897,000, signalling that harsh winter weather has slowed economic activity; starts for single family units dropped 14.9%, while multifamily units fell 20.8%. Midweek, the Mortgage Bankers Association stated that its seasonally adjusted index of mortgage activity fell 3.9% for the week ended March 13, as purchase and refinancing applications dropped 5.2% and 1.5% respectively; the refinancing share of the index fell to 59% of applications, marking the lowest level since October 2014. On Wednesday, Federal Reserve Chair Janet Yellen made her FOMC statement saying that "With continued improvement in economic conditions ... we do not want to rule out the possibility that an increase in the target range could be warranted at subsequent meetings (to the April FOMC meeting). Let me emphasize ... that the timing of the initial increase in the target range will depend on the committee's assessment of incoming information." Yellen also stated that "...just because we removed the word 'patient' from the statement doesn't mean we're going to be impatient." The committee will raise the target range for federal funds "when it has seen further improvement in the labor market and is reasonably confident that inflation will move back to its 2% objective over the medium term." U.S. initial jobless claims data reported on Thursday showed that claims for the week ended March 14 rose by 1,000 to a seasonally adjusted 291,000, while analysts had expected a jump to 292,000; the 4-week moving average was 304,750, following the prior week's total of 302,500. In a separate report released on Thursday, the Conference Board index, which is intended to forecast future economic growth through an index comprised of 10 key variables that historically turn down before a recession and up before expansion, gained 0.2% for the second consecutive month, matching the median forecast of economists, but coming in lower than the 0.5% average increase over the last 6 months of 2014.

Canada: The only significant economic data out of Canada this week showed that February's inflation rate climbed 1.0% YoY as falling gasoline prices were offset by other consumer goods and services; the 1.0% YoY increase was the same reading as in January. Core inflation.

Asia: A report released on Tuesday showed that foreign investment in China for the month of February was flat at \$8.56 billion, a mere 0.9% increase from the same period in 2014 and substantially lower than January's \$13.92 billion; foreign investment in the January/February period is up 17% year on year (YoY) to \$22.48 billion; MoM figures in the first couple of months of the year are volatile owing to the occurrence of the Lunar New Year. On Wednesday, data from the Melbourne Institute showed that Australia's Westpac Leading Index, which tracks nine gauges of economic activity aimed to provide an indication of how the economy will perform, gained 0.3% MoM in February, following a 0.1% increase in January; February was the first month since January of 2014 where the reading was above trend, suggesting that the economy may begin to gain some momentum near the end of 2015. On Thursday, Japan's all industries activity index rose 1.9% m/m in January, compared to decreases of 0.1% and 0.3% in November and December respectively, while beating analysts' expectations for a 1.7% rise. The Census and Statistics Department said on Friday that Hong Kong's composite CPI rose 4.6% YoY in February due to the Chinese New Year

falling in February this year but January last year; February's reading was higher than January's 4.1% rise, and beat the median 4.5% gain estimated by three economists surveyed by The Wall Street Journal.

Europe: The Centre for European Economic Research reported on Tuesday that German investor confidence rose for the fifth consecutive month, edging up 1.8 points to 54.8 as analysts and investors gave positive assessments of the current state of the economy and its future prospects. On Wednesday, data showed that the Eurozone Core Consumer Price Index (CPI), which excludes energy, food, alcohol, and tobacco, rose 0.7% MoM in February from 0.6% MoM in January and was slightly higher than initial estimates calling for a 0.6% MoM rise. The International Labour Organization (ILO) jobless rate in the UK fell to 5.7% in the 3-month period ending January, from 6% in the previous quarter; in the same period last year the unemployment rate was 7.2%, coming in higher than the expected rate of 5.6%. On Wednesday, Sweden's Riksbank cut its repo rate to -0.25% following last month's reduction to -0.10%, citing signs that inflation has "bottomed out and is beginning to rise." However, the recent appreciation of the krona, which has gained 2% following February's repo cut, risks breaking this trend.

Global Commodity News

LME-Malaysia tax hitch may disrupt Asia metals trade – Malaysia's newly enacted goods and services tax, starting in April, may cause the London Metal Exchange to stop issuing warrants for metals in Johor and Port Klang if authorities don't confirm that transactions and storage charges will be exempt from the tax. Malaysian warehouses currently hold nearly 90% of LME registered tin, approximately 50% of global nickel, and nearly all zinc and lead in Asia; if trade logistics in Asia are in fact disrupted by the tax, the impact of moving inventory around prior to the tax being implemented would undoubtedly cause certain base metal prices to slide. The 6% goods and services tax is being implemented to help cut the nation's fiscal deficit and will replace the existing sales and services tax. Malaysian warehouses have been preferable for the LME owing to the low cost of storage and their tax-free status. The LME claims that it shouldn't be liable for taxes on transactions and storage, as well as duties incurred prior to clearing customs. Henry Neo, the owner of H&M Metal Warehousing Pte., which runs LME-registered warehouses in Asia, stated that "what happens inside a free trade zone should be free from taxes, including rent, because that adds up to the carrying cost of the metal." A tax put on warehouse rent will increase the cost of storage and ultimately diminish the allure that made Malaysia a prime location for the LME to hold inventory. No official statement has been issued by the Malaysian government regarding the exempt or non-exempt nature of the LME warehouses.

JUNIOR EXPLORER: WEEKLY VANTAGE POINT

News from the Junior sector this week included drilling results from Pure Gold's (PGM-V) Madsen gold project in Ontario, Fission Uranium's (FCU-T) Patterson Lake South project in Saskatchewan, and NexGen Energy's (NXE-V) Rook 1 project also in Saskatchewan.

Mining Flashes

Pure Gold Mining Inc. (PGM-V, \$0.28) – Second Target at Russet South Yields More High-Grade Results

Mick Carew, PhD | mcarew@haywood.com, Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, CFA | dochoa@haywood.com

- Gold mineralization intersected at new target – Pure Gold released more assay results from its ongoing Russet South drill program at its 100% owned Madsen gold project in northwest Ontario. The latest results are from drilling focused on the Beta target and the Alpha target, which returned high-grade gold in results reported on March 2, 2015 (see *Mining Flash*, March 3, 2015). Highlights from Monday's results from Beta include:
- 2.9 metres grading 39.1 g/t gold from a downhole depth of 13.2 metres (Beta Target) in drill hole PG15-031,
- 1.7 metres grading 37.5 g/t gold from a downhole depth of 47.3 metres (Beta Target) in drill hole PG15-032.

See Haywood Securities for the full report

Fission Uranium Corp. (FCU-T, \$1.24) – Fission Extends R600W Zone at Patterson Lake South Project

Mick Carew, PhD | mcarew@haywood.com, Colin Healey, MBA | chealey@haywood.com

- Fission Uranium announced follow-up drill results from its R600W Zone where on March 1, 2015, it discovered apparent high-grade (high scintillometer counts per second [cps]) uranium mineralization (hole PLS15-343), located 555 metres west of Zone R00E of the Triple R deposit in Saskatchewan. Fission discovered the R600W Zone with follow-up drilling of a radon in sediment anomaly during the Company's summer 2013 program, which was subsequently followed-up in 2015 with hole PLS15-343, which returned significant widths of elevated radioactivity. Importantly, R600W is situated on land, in contrast to R780E Zone that lies under Patterson Lake. Highlights from the latest set of scintillometer results from R600W include:
- Hole PLS15-364 that intersected 45.5 metres total composite mineralization over a 61.0-metre section (between 107.0 metres and 168.0 metres) including 6.44 metres total composite mineralization of > 10,000 cps radioactivity
- Hole PLS15-352, which intersected 56.5 metres of mineralization (between 102.5 metres and 159.0 metres) including 12.11 metres total composite mineralization of > 10,000 cps radioactivity including 11.77 metres continuous mineralization of > 10,000 cps radioactivity.

See Haywood Securities for the full report

NexGen Energy Ltd. (NXE-V, \$0.43)

Share Price: (52-week high/low: \$0.60/\$0.235)

Daily Average Volume for the Week: 550,520

Market Capitalization: \$81 million

Shares Outstanding: 171 million

Working Capital: ~\$14 million (January 2015)

Debt: -

Date of Release: March 19, 2015

Event: NexGen Energy released assay results from drilling at its Arrow Zone on the Company's 100% owned Rook 1 Property in Saskatchewan. Scintillometer readings from these holes were previously released in February (see Mining Flash February 17, 2015).

Results: Highlight results include:

- hole AR-15-37, which returned 16.5 metres grading 2.46% U₃O₈ from a downhole depth of 580.5 metres, including 3.0 meters grading 12.85% U₃O₈; and 40.0 metres grading 2.88% U₃O₈ from a downhole depth of 621.5 metres , including 22.0 metres grading 4.92% U₃O₈
- hole AR-15-38, which returned 32.0 metres grading 0.90% U₃O₈ from a downhole depth of 583.5 metres..

Comments: The latest assay results from NexGen Energy confirm the positive scintillometer results from the same holes released in February. Hole AR-15-37 effectively supports the higher-grade uranium intersections previously drilled along the A2 mineralized structure at Arrow (e.g. hole AR-15-30), while hole AR-15-38 has expanded the mineralized “core” to 88 metres. Mineralization in both holes is associated with semi-massive to massive veins, pods and fracture-controlled pitchblende. NexGen have three drill rigs on site, testing both the Arrow target and other regional targets within the Rook 1 property including Fury. As part of a 18,000 metre (\$9 million) program, we expect additional results from both Arrow and other regional targets soon.

HAYWOOD RESEARCH: THE WEEK IN REVIEW

Publications from the Haywood Research team for the week included the following:

- Q4/14 financial results from Rio Alto Mining (RIO-T)
- Q4/14 financial results from B2Gold (BTO-T)
- A pre-feasibility study from Klondex Mines (KDX-T)
- A gold stream restructuring from Luna Gold (LGC-T)
- Completion of Pilot Gold's (PLG-T) 60% earn-in at the TV Tower project
- A senior secured bridge loan facility for Coro Mining (COP-T)
- An amended 3-year credit facility for Hudbay Minerals (HBM-T)
- An update for Uranium Participation Corp. (U-T)
- A revised operating plan from Endeavour Silver Corp. (EDR-T)

RADAR FLASHES

Rio Alto Mining Limited (RIO-T, \$3.40) – 2014 Results – A Slight Miss...

Kerry Smith, PEng, MBA | ksmith@haywood.com, Ardem Keshishian, CFA | akeshishian@haywood.com

- 2014 Financials released...a miss in Q4 – For 2014, cash flow before working-capital changes was US\$73.7 million, or US\$0.31 per share, versus our estimate of US\$0.37 and consensus of US\$0.39, while Q4 was US\$17.4 million of cash flow (US\$0.05 per share), versus consensus of US\$0.08. Q4 per-share results were impacted by the issuance of 153.4 million shares for the acquisition of Sulliden Mining, which closed August 5. Rio Alto also paid US\$38.6 million of cash tax in 2014.

See Haywood Securities for the full report

B2Gold Corp. (BTO-T, BTG-N; \$1.90) – Q4/14 Financials Miss the Mark As Production Expansion Timeline Extended

Geordie Mark, PhD, FSEG | gmark@haywood.com, Benjamin Asuncion | basuncion@haywood.com

- Q4/14 financials – Operating cash flow (before changes in working capital) was US\$22.6M/ US\$0.02 per share on revenues of US\$122.4M and earnings before interest, taxes, depreciation, and amortization (EBITDA) of US\$43.7M, which compares with Haywood estimates of US\$39.2M/US\$0.04 per share in cash flow on revenues of US\$138.4M and EBITDA of US\$45.7M. The Street was looking for cash flow of US\$0.04 per share. A reported net loss of US\$357M or US\$0.39 per share was driven mainly by a US\$436M impairment charge, which excluding the aforementioned, would have resulted in an adjusted loss of US\$8.4M (US\$0.01 per share).
- Consolidated production – Q4 production was 112 koz of gold at a cash cost of US\$686/oz and an all-in sustaining cost (AISC) of US\$965/oz (Haywood definition), which compared with Haywood estimates of 112 koz of gold at a cash cost of US\$719/oz and an AISC of US\$1,110/oz.

See Haywood Securities for the full report

Klondex Mines Ltd. (KDX-T, \$2.45) – Higher Grades Come with Higher Costs, But Remain Robust in a Weaker Gold Environment

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochao@haywood.com

- Unit operating costs up on big increases in processing and G&A costs – When the reserve was published in late February, we had highlighted a sizable increase in unit operating costs (total unit costs increased to US\$460/ton, up from US\$292/ton), but no breakout of cost centres was provided. The prefeasibility study (PFS) provides this breakout and shows that the biggest contributors to the increase were milling and general and administrative (G&A), which both increased more than 120% from the 2014 Preliminary Economic Assessment (PEA).
- Grade increase helps offset most of the cost increase – As highlighted at the time of the reserve release, the mine plan at Fire Creek now incorporates substantially higher grades than in the 2014 PEA (1.33 oz/ton, up from 0.68 oz/ton). In general, this grade increase helps to somewhat offset the increase in unit costs. However, total costs on a per-ounce basis have increased to US\$492/oz from US\$459/oz previously.

See Haywood Securities for the full report

Luna Gold Corp. (LGC-T, \$0.27) – Gold Stream Restructuring Doesn't Solve the Bigger Problems

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochao@haywood.com

- This morning Luna announced the signing of a Letter of Intent with Sandstorm Gold (SSL-T, not rated) outlining restructuring of its gold stream and debt facility agreement. Currently Sandstorm holds a 17% gold stream on Luna's Aurizona project and has a US\$20 million debt facility outstanding to Luna.
- Under the terms of the proposed restructuring the stream would be terminated and replaced by two Net Smelter Royalties (NSR's) (the "Aurizona Project NSR", and the "Greenfields NSR"), and a convertible debenture.

See Haywood Securities for the full report

Pilot Gold Inc. (PLG-T, \$0.82) – Earn-In Complete at TV Tower

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochao@haywood.com

- This morning Pilot Gold announced completion of its 60% earn-in at the TV Tower project located in northwest Turkey.
- Pilot Gold is the project operator and completed its earn in through sole funding of exploration over a two and a half year period. Since June 2012, Pilot Gold has incurred US\$21 million in exploration expenditures. With earn-in now complete, Teck will be funding its pro-rata share of expenses, including the 2015 exploration program which is expected to begin shortly, and Pilot Gold expects to complete significantly more drilling at a lower overall cost to Pilot Gold.

See Haywood Securities for the full report

Coro Mining Corp. (COP-T, \$0.03) – Berta Financing Leaves Little Breathing Room – San Jorge Sale Comes at a Cost

Stefan Ioannou, PhD | sioannou@haywood.com, Jenny Lemberg | jlemburg@haywood.com

- Berta's financing package includes a senior secured bridge loan facility (Auramet). Although not formally disclosed, the terms of the facility are implicitly expensive, noting the US\$13.5M headline figure provides for ~US\$3.5M of interest and fees due to be paid at the end of the 18-month loan (i.e., US\$10.0M is available to fund capital costs at Berta). Furthermore, we view the 18-month term with caution, as this time frame will be

triggered on initial drawdown (mid-2015 in Haywood model). Hence, timely start-up/ramp-up will be key to generating enough free cash flow to repay the loan facility (due in early 2017 in Haywood model).

See Haywood Securities for the full report

Hudbay Minerals Inc. (HBM-T, \$9.43) – Hudbay Expands Corporate Revolving Facility – Rosemont Air Permit Rescinded

Stefan Ioannou, PhD | sioannou@haywood.com, Jenny Lemberg | jlemburg@haywood.com

- In connection with the issuance of senior unsecured notes in June 2013, Hudbay entered into an amended 3-year revolving credit facility with a syndicate of lenders. The facility had a maximum availability equal to the lesser of US\$100M and a borrowing base related to the accounts receivable and inventory of the Company's Manitoba business unit (valued at US\$86M as of December 31, 2014). As of December 31, 2014, ~US\$55M supported Letters of Credit pertaining to reclamation obligations in Manitoba (i.e., not available to fund capital-cost initiatives).

See Haywood Securities for the full report

Uranium Participation Corp. (U-T, \$5.57) – Physical Inventory Discount to Market Persists Despite Uranium Price Trajectory

Colin Healey, MBA | chealey@haywood.com

- Normalization to Historic Average Discount of 2% Represents 17% Upside: Over the last 12 months U-T shares have traded at an average premium to spot uranium of 4%, but currently trade at a >16% discount (see Exhibits 1 & 2 for details).
- Correction of U-T back to >7-year historic average discount to spot/BAP of 2% (vs current >16% discount) represents 17% upside (U-T at \$6.50).
- Correction of U-T FIP back to par with current UxC BAP of US\$40.06/lb U3O8 represents 19% upside (U-T at \$6.63).

See Haywood Securities for the full report

Endeavour Silver Corp. (EDR-T, EXK-N; \$2.13) – Endeavour Eyes El Cubo Expansion to Drive Higher Production and Lower Costs

Benjamin Asuncion | basuncion@haywood.com

- El Cubo's revised operating plan – Production at El Cubo is anticipated to ramp-up to 2,200 tpd by mid-year (from ~1,550 tpd) with the additional 650 tpd of mine production to be sourced from the V-Asuncion area (thicker mineralized zones and amenability to long-hole mining) and to a lesser extent the Santa Cecilia area (narrower but higher grade veins). Additional mine production in excess of internal capacity will be processed at the Bolañitos mill (approximately 18 kilometres away).
- Revised guidance – Management now anticipates production of 6.3 Moz to 7.0 Moz of Ag, plus 60.0 koz to 66.0 koz of Au at a cash cost of US\$9 to US\$10/oz of Ag (net Au). Previous guidance called for 5.8 Moz to 6.4 Moz of Ag, plus 47.0 koz to 52.0 koz of Au at a cash cost of US\$10 to US\$ 11/oz of Ag (net Au). Haywood estimates 6.2 Moz of Ag, plus 50.8 koz of Au at a cash cost of US\$11.35/oz of Ag (net Au).

MARKET ESSENTIALS

Companies in the News

- **BHP Billiton Ltd. (BHP-ASX)** announced on Monday that its spinoff company, **South32**, will launch in May with net debt of approximately US\$674 million and return at least 40% of its underlying earnings to shareholders through dividend payments. Many analysts had expected the spinoff company to begin with \$1 billion to \$1.5 billion in debt. Documents show that South32's portfolio of manganese, aluminum, coal, and other assets, deemed non-core, had a gross value of \$26.7 billion at the end of 2014. South32's portfolio of assets made a pre-tax profit of \$422 million in 2014 based on revenues of \$10.4 billion.
- **Fortescue Metals Group (FMG-ASX)** announced on Wednesday that it has pulled a proposed US\$2.5 billion secured bond issue, citing unfavourable and volatile U.S. credit markets that pushed up the cost of the bond yield. The latest decision comes after the Company failed to raise the same amount in an attractive term loan that fell through as investors sought better terms. The Company had offered a rate as high as 9% in an attempt to lure investors before pulling the issue; the funding cost for the bond issue was likely to be between 8.5% and 9%. None of Fortescue's debt matures until 2017, and the Company has flexibility with regard to financing, as no financial covenants need to be met in the meantime.
- **Teck Resources Limited (TCK-NYSE)** announced on Tuesday that Andrew Stonkus has been appointed Senior Vice President Marketing and Sales. Mr. Stonkus holds a Bachelor of Science in Metallurgy and Materials from McMaster University and has more than 30 years of marketing and sales experience in the mining industry. Mr. Stonkus joined the Company in 1988, and his most recent position was Vice President Base Metals Marketing.
- On Tuesday, **Glencore (GLEN-LSE)** released its annual report showing that its total wage bill rose by \$1 billion in 2014 despite cuts to its workforce in excess of 22,000 workers, as it sold its Las Bambas copper mine in Peru. Glencore's wage bill rose from \$5 billion in 2013 to \$6 billion in 2014 due to 2013's wage bill only included seven months of Xtrata, which was taken over that year. The Company reported that no bonuses and long-term incentives were ever granted to Ivan Glasenberg, as his wage remained steady at \$1.5 million in 2014.
- **Kirkland Lake Gold (KGI-T)** announced on Wednesday that it started off Q4/15 by achieving record monthly production of 16,485 ounces of gold (recovered) in February. In total, 32,862 tons were milled at a head grade of 0.52 ounces per ton, at a recovery rate of 96.8%. The Company stated that it cannot yet consistently replicate February's exceptional production, but as more stopes come on line at its South Mine Complex 5400 and 5600 levels, consistency should improve. The recently revised production forecast calls for 153,000 to 157,000 ounces annually.
- **Silver Wheaton Corp. (SLW-NYSE)** announced on Wednesday that it recorded a 47% year-on-year drop in net earnings for 2014 mainly owing to a US\$68.2 million impairment related to the Mineral Park and Campo Morado silver interests and a falling silver price. The Company reported that full-year net earnings dropped to US\$199.8 million or \$0.56 per share, from US\$375.5 million or US\$1.05 per share in 2013. The Mineral Park mine write-down was due to Mercator Minerals Ltd. going bankrupt, while the Campo Morado impairment consisted of a US\$25 million cash payment to Nystart NV to cancel its silver stream agreement. Total revenue for 2014 amounted to US\$620.2 million, down from US\$706.5 million in the previous year as the Company saw a 20% decline in the average realized silver price.
- **Rio Tinto (RIO-NYSE)** reported on Wednesday that it paid US\$7.1 billion worth of taxes in 2014, a 5% decrease from 2013 owing to lower underlying earnings. Of the total tax payments, US\$5.6 billion was paid to governments in Australia and an additional US1.8 billion was paid on behalf of its employees. Rio Tinto is a

strong advocate of the need for transparency related to payments made to governments around the world, and unlike BHP, Rio voluntarily issues an annual taxes paid report.

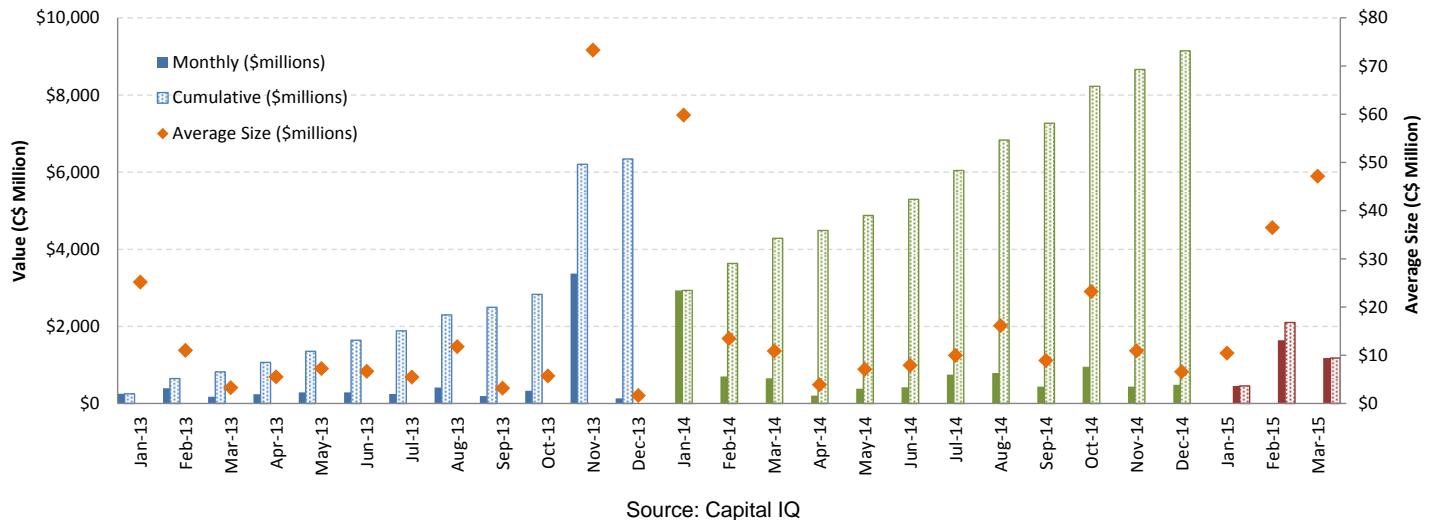

- **Pan Pacific Copper**, the majority owner and operator of the Caserones copper mine in northern Chile, will have to pay \$11.9 million for breaching environmental rules, according to Chile's environmental authority (SMA). The fine is the second largest ever issued by the SMA, after a regulator found a number of infractions at the mine, including the failure to implement mitigation measures to prevent the contamination of underground water sources and the unauthorized construction of transmission lines. In total, the mine violated 17 items, of which 8 were deemed serious.
- On Wednesday, **Forsys Metals (FSY-TSX)** reported a 14.8% increase in reserves, higher life of mine (LOM) and yearly output, and lower operating costs for its Norasa uranium project, following the completion of a feasibility study. Economic analysis showed an estimated after-tax net present value (NPV) at a discount rate of 8% of \$383.4 million and capital outlay amounting to \$432.8 million, up from \$392 million previously estimated in the National Instrument 43-101 compliant technical report. The latest study estimates Norasa's reserves at approximately 90.7 million pounds of uranium oxide, up from 79 million pounds reported in October 2013. Norasa's expected operating costs were \$32.96 per pound over the first 5 years and \$34.72 per pound over the 15-year LOM, substantially lower than the 2013 cost estimate of \$34.76 per pound and \$38.20 per pound.

Financings

- **Rubicon Minerals Corp. (RMX-TSX)** announced on Wednesday that it will be increasing its previously reported bought-deal private placement to C\$25.1 million owing to increased demand. The offering will now consist of 19.6 million flow-through shares priced at C\$1.28 per share, and Rubicon has granted the underwriters an overallotment option to purchase up to 4 million additional shares for gross proceeds of C\$5.1 million, bringing the total proceeds to C\$30.2 million; the option is exercisable up to 48 hours prior to the anticipated April 9 closing date. The funds will be used for Canadian exploration expenses.
- **Rockhaven Resources Ltd. (RK-V)** announced on Friday that it has arranged a 21.0 million share private placement with its largest shareholder, Strategic Metals Ltd. The placement will consist of a share offering at \$0.21 per share, no warrants included, for total proceeds of \$4.41 million. Strategic Metals owns 32.22% of Rockhaven's share capital and following the closing of the latest placement it will hold 46.59%. Rockhaven will use the proceeds to finance exploration efforts at its 100% owned Klaza gold-silver property and for general working capital purposes.

1	The Analyst(s) preparing this report (or a member of the Analysts' households) have a financial interest in this company.								
2	As of the end of the month immediately preceding this publication either Haywood Securities, Inc., one of its subsidiaries, its officers or directors beneficially owned 1% or more of this company.								
3	Haywood Securities, Inc. has reviewed lead projects of this company and a portion of the expenses for this travel have been reimbursed by the issuer.								
4	Haywood Securities Inc. or one of its subsidiaries has managed or co-managed or participated as selling group in a public offering of securities for this company in the past 12 months.								
5	Haywood Securities, Inc. or one of its subsidiaries has received compensation for investment banking services from this company in the past 12 months								
6	Haywood Securities, Inc. or one of its subsidiaries has received compensation for investment banking services from this company in the past 24 months								
7	Haywood Securities, Inc. or one of its subsidiaries is restricted on this company at the time of publication								
8	Haywood Securities, Inc. or one of its subsidiaries expects to receive or intends to seek compensation for investment banking services from this company in the next three months								

Other material conflict of interest of the research analyst of which the research analyst or member knows or has reason to know at the time of publication or at the time of public appearance:

- Haywood Securities Inc. pro group holdings exceed 10% of the issued and outstanding shares of Zazu Metals Corp. (ZAZ-T).

Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY – The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in is expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company's stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

http://www.haywood.com/research_dissemination.asp

Overall Risk Rating

Very High Risk: Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

High Risk: Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

Medium-High Risk: Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital

Moderate Risk: Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.

Risk Profile Parameters – Mining and Minerals Sector

Forecast Risk: High (7-10) – The Company's primary project(s) is at an earlier stage of exploration and/or resource delineation whereby grades, tonnages, capital and operating costs, and other economic/operational parameters are not yet reliably established. **Moderate (4-6)** – The Company has taken steps to de-risk its primary producing, or soon to be producing project(s) and has established reasonably reliable operational and economic parameters. **Low (1-3)** – The Company has de-risked the majority of its primary project(s) through operational history and established production profile(s).

Financial Risk: High (7-10) – The Company's near- and medium-term (capital) expenditure considerations, including the current year or next forecast year, are not fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations—successful project execution depends, in part, on future (equity) financing(s). Existing and/or forecast levels of leverage are above average relative to the Company's peer group. The risk of a significant capital cost overrun(s) is high given the early stage of project development. **Moderate (4-6)** – The Company's near-term (capital) expenditure program, in the current year or next forecast year, is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Medium-term funding requirements will likely require additional financing consideration, but should be achievable assuming no significant uncontrollable events impede access to capital. Existing and/or forecast levels of leverage are in-line with the Company's peer group. The risk of a significant capital cost overrun(s) is moderate given the advanced stage of project development. **Low (1-3)** – the Company's near- and medium-term (capital) expenditure program is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Existing and/or forecast levels of leverage are below average relative to the Company's peer group.

Valuation Risk: High (7-10) – The current valuation is at a premium to peers. The valuation reflects considerable future exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the "DCF" evaluation by more than 50%. **Moderate (4-6)** – The current valuation is within historic ranges and generally consistent with peers. The valuation reflects reasonable exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by 15% to 50%. **Low (1-3)** – The current valuation is at the low end of historic ranges

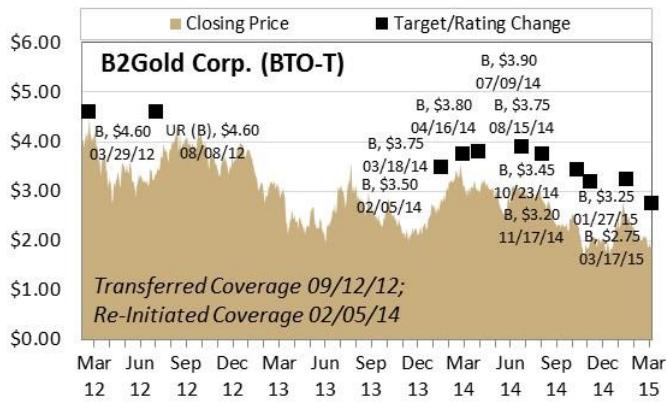

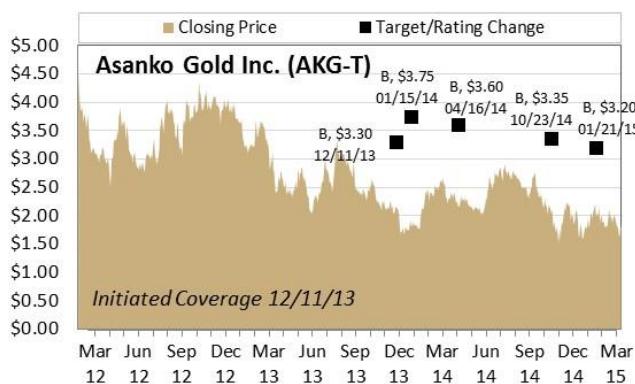

and at a discount to peer valuations. The valuation reflects limited new exploration success and no commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by less than 15% or falls below the current market value.

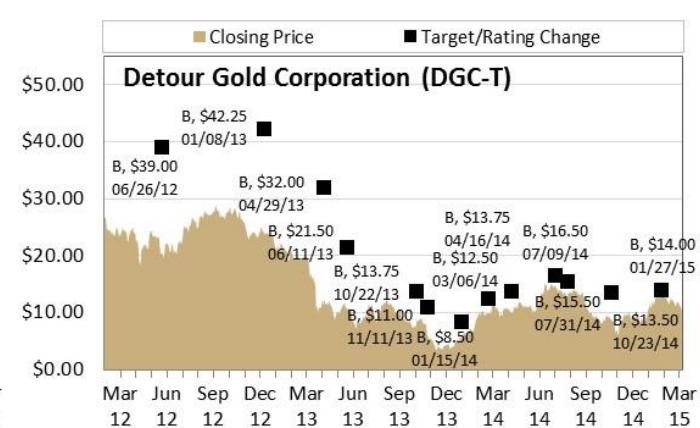

Political Risk: High (7-10) –Obtaining permits is challenging. Properties are located in an area(s) with high geo-political uncertainty, limited access, and/or have significant new infrastructure requirements. **Moderate (4-6)** – Properties are located in an area(s) with moderate geo-political risk, reasonable or manageable access, and some established infrastructure. **Low (1-3)** – Properties are located in areas with a manageable geo-political risk profile and established access/infrastructure.

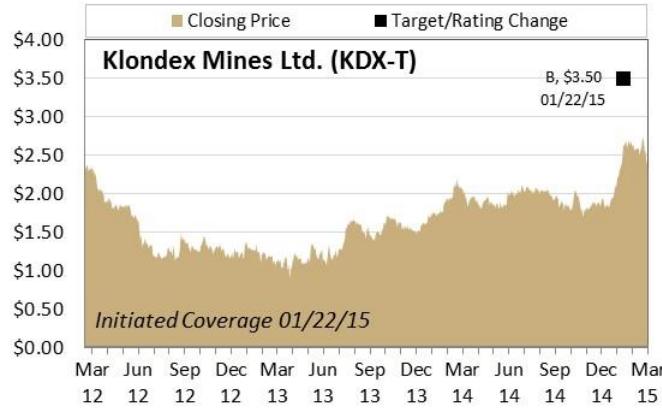

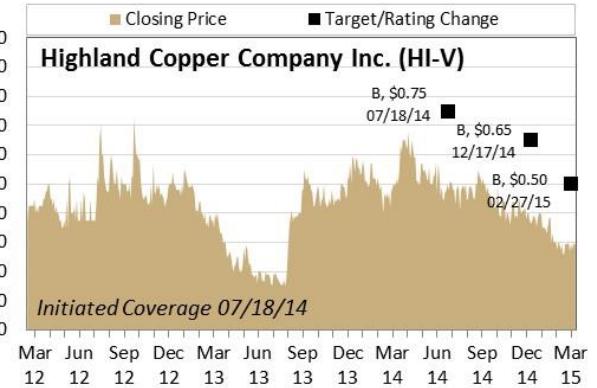

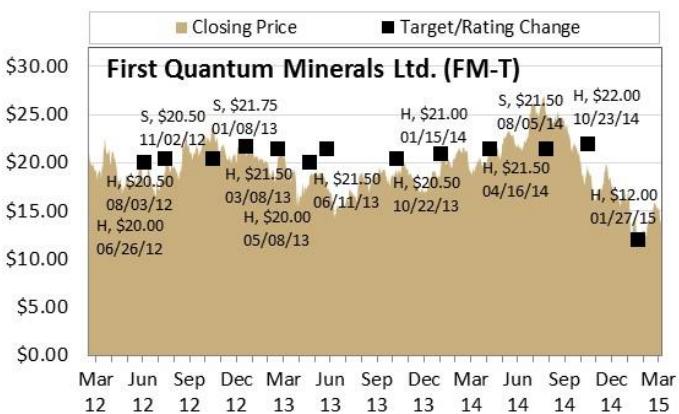

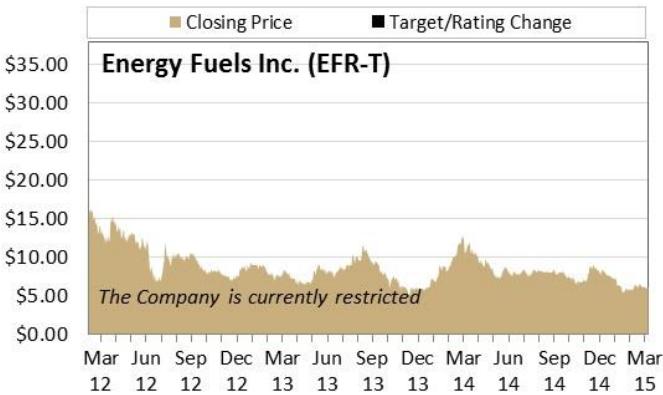

Distribution of Ratings (as of March 20, 2015)
