

**HAYWOOD'S HERITAGE MOMENT: KING SOLOMON**

Archaeological investigations of ancient copper mining sites in southern Jordan, conducted in 2008, suggest that these mines were producing the metal as early as the tenth century BCE, the time King Solomon is said to have reigned over Israel.

## MARKETS SKITTISH AFTER RUSSIAN TROOPS ALLEGEDLY CROSS UKRAINE BORDER

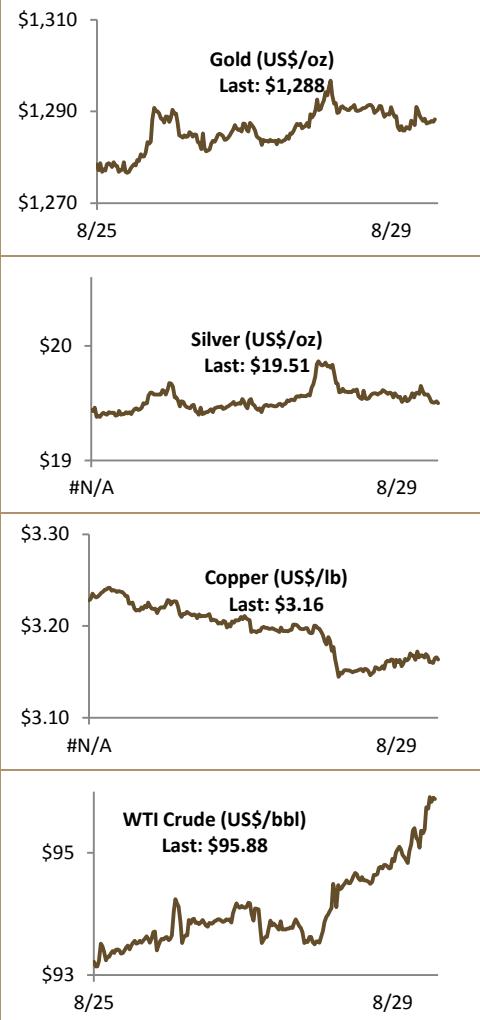

A statement from Ukrainian President Petro Poroshenko accusing Russian troops of crossing the border into eastern Ukraine unsettled markets during the week. Russia has again denied direct involvement in the civil unrest in the Ukraine, angering western nations who have threatened further sanctions against Russia, although direct military conflict in the Ukraine by the west has been ruled out at this stage. The markets remained flat early in the week, before falling on Thursday after the news was circulated. Friday saw a marginal rise in the indices as the positive U.S. economic data during the week boosted sentiment and concerns over the Ukraine conflict waned. Meanwhile, Barack Obama alluded to the possibility of airstrikes against Islamic fundamentalists in Syria, after escalating violence and graphic images distributed on the internet by the Islamic State. The Dow Jones finished flat at 17,098 for the week, while the S&P500 rose over 2,000 for the first time before finishing at 2,002. The S&P/TSX Venture continued its rise, hitting the 1,020 mark before settling at 1,023 on Friday, while the S&P/TSX late-week rise saw the index finish at 15,617 after falling as low as 15,530 earlier in the week. In the commodities space, precious metals were up for the week, with gold, silver, platinum and palladium each finishing at 1,288, \$19.52, \$1,424 and \$905 per ounce respectively. Base metals were mixed, with copper down 1.3% to \$3.18 per pound on the back of positive U.S. economic data, while nickel and zinc were up marginally, finishing at \$8.49 and \$1.07 per pound respectively.

## METALS SECTOR MACRO

### Macroeconomic News

**World:** On Thursday, Ukrainian president Petro Poroshenko said that Russian troops had entered the country to support pro-Russian rebels in Donetsk and Luhansk. U.S. and British officials were angered with Russia's denials it had sent combat forces into Ukraine and threatened to impose stiffer economic sanctions on Moscow. But U.S. President Barack Obama stopped short of calling Russia's actions an invasion. Washington's U.N. envoy, Samantha Power, was also scornful of Moscow's denials, saying: "At every step, Russia has come before this council to say everything except the truth. It has manipulated, it has obfuscated, and it has outright lied." Meanwhile, the escalating violence in Syria and Iraq by the Islamic State continues to intensify; U.S. president Barack Obama did not rule out the possibility of air strikes against the group in Syria.

**United States:** After strong U.S. economic data last week, this week saw new home sales drop 2.4% to an annual rate of 412,000 in July from a revised figure of 422,000 for June. The drop was particularly severe in northeastern U.S., down 30.8%. New home sales have lost much of their momentum since the beginning of last October, derailed by modest wage growth, a bump in mortgage rates and builders focusing more on high-end homes for wealthier buyers. In other housing news, Wednesday saw this weeks' MBA mortgage application rise 2.8% for the week ending August 22, well ahead of the 1.4% increase recorded the previous week. Fixed 30-year mortgage rates averaged 4.28% in the week, down 1 basis point from the week before. Meanwhile, it was better news for durable goods figures, which surged 22.6%, or \$300.1 billion, in July, the best month on record, on the back of an increase in civilian aircraft orders. The figures eclipsed economists' expectations, which called for a 7.5% increase. However, excluding aircraft and other transportation equipment, orders fell 0.8% in July from the prior month's upwardly revised gain of 3%, and was up 6.6% from a year earlier. Consumer confidence climbed unexpectedly to 92.4 in August, a seven year high, exceeding both the previous month (90.36) and economists' expectations of (88.5). The rise is believed to be largely attributed to a better job market and a rising stock market. GDP for Q2 grew at a faster rate than expected; rising 4.2% QoQ versus expectations of a 3.9% rise. Business spending grew more in the second quarter than initially estimated and US-based corporations posted higher profits. On the jobs front, initial jobless claims dropped by 1,000 to 298,000 for the week ending August 22, while the four-week moving average fell to 299,750. Economists had expected a slight rise in initial jobless claims for the week, estimating a figure of 300,000.

**Canada:** GDP for Q2 rose 3.1% QoQ which was more than expected, after a 0.9% QoQ (revised) rise in Q1. Economists expected a 2.7% rise. The rise was the largest quarterly gain since Q3'11. Households have been largely responsible for keeping the economy going, and once again led growth in the second quarter, with their final consumption expenditure rising by an annualized 3.8 percent.

**Europe:** Consumer confidence in Italy dropped further in August for the third month in a row. Economic experts say the drop was due to the declining perceptions of the current economy and the lower expectations of future economic conditions. This follows quarterly figures which show the country's GDP contracting by 0.2% in Q2, putting Italy officially back into recession. Latest surveys show Italians expect unemployment to continue to rise and see no pick-up in consumer prices. Business confidence in Germany was weaker than expected in August, falling to 106.3 from 108.0 the previous month. The fall was worse than economists expected, who forecast a drop to 107.0. The German economy contracted by 0.2% during Q2, or 0.6% in annualized terms. Much of that decline was due to temporary factors, such as weakness in construction after a warm winter boosted the sector during the first three months of the year, and public holidays that restrained production. Business confidence in France also fell in August, down to 96 from 97 in July. The survey was

conducted just before President Francois Hollande dissolved his government, ejecting critics of his pro-business policies. The critics said Mr. Hollande should do more to cut taxes for households, while the president said he would forge ahead with the plan to cut business taxes.

## Global Commodity News

**Potash Prices Start to rise 12 months after “Baumgartner’s Breakup”:** Twelve months after the breakup of the Belarus-Russia potash cartel, commentators have suggested that potash prices are set to rise after a 7% increase in global potash deliveries during the year. Sales of potash have risen in North America and Brazil, in particular, while spot potash prices (FOB Vancouver) have also risen steadily. Demand in Brazil is particularly high given the short supply of granular potash and SOP (Sulphate of Potash); Brazilian potash imports have risen 26% to a record 4.6 million tonnes during H1’14. According to reports, granular potash prices in Brazil may increase from \$355-\$360 per tonne to \$380 per tonne CFR Brazil.

**Uranium Price Update:** The Broker Average Price (BAP) is now up 15.3% in August, and made significant moves this week following news of the Cameco - Key Lake Mill / McArthur River lockout (~13 Mlb/year of production temporarily offline; see section Market Essentials for further details). Meanwhile, the spot price was unchanged Monday, and undercut the BAP by \$0.38/lb on that day earlier this week. It is rare to see the spot / BAP spread at more than \$0.10-\$0.20/lb, and the long-term average spread is about \$0.06/lb. The Weekly Spot price is widely published (Monday’s) and the current BAP (daily), at \$33/lb, is \$2.00/lb above current spot, setting up well for a material positive move in Weekly Spot price this coming Monday night.

**“Ring of Fire” Development Corporation established:** On Thursday, the Ontario government announced that it has established the Ring of Fire Development Corp., a major milestone towards spending ~\$1 billion on infrastructure in the region. The entity is designed to bring different sections of the community together, including First Nations, mining companies and local communities, to determine the best way of utilizing the committed budget. “The development corporation is a vital step toward building the much-needed infrastructure that is critical to realizing the full potential of the Ring of Fire,” said Michael Gravelle, the minister of Northern Development and Mines for the province. “It is a key building block to achieving our mutual goals of unlocking regional economic growth and benefitting from value-added opportunities like mineral processing and job creation.”

## JUNIOR EXPLORER: WEEKLY VANTAGE POINT

News from the Junior sector this week included **DuSolo Fertilizer (DSF-V)** obtaining an operating licence for its proposed Santiago mine in Brazil, details of a definitive agreement between **Talon Metals (TLO-T)** and Kennecott Exploration; drill results from **NexGen Energy's (NXE-V)** Arrow Zone in Saskatchewan, **Fission Uranium's (FCU-V)** Patterson Lake South project in Saskatchewan and **ATAC Resources' (ATC-V)** Rackla project in the Yukon Territory.

### Mining Flashes

- [DuSolo Fertilizers Inc. \(DSF-V\)](#)
- [Talon Metals Corp. \(TLO-T\)](#)
- [Fission Uranium Corp. \(FCU-V\)](#)
- [NexGen Energy Corp. \(NXE-V\)](#)
- [ATAC Resources Ltd. \(ATC-V\)](#)

### Mining Flashes

#### [DuSolo Fertilizers Inc. \(DSF-V, \\$0.24\) – DuSolo Obtain Mine Site Operational Licence for Santiago](#)

**Mick Carew, PhD** | [mcarew@haywood.com](mailto:mcarew@haywood.com), **Colin Healey, MBA** | [chealey@haywood.com](mailto:chealey@haywood.com)

- Today, DuSolo announced it has secured an operational licence for its proposed Santiago mine, which forms part of its Bomfim phosphate project in central Brazil. This follows the finalization of a number of other licences by the Company over the last month, which include the Environmental and Operating Licenses for its Direct Application Natural Fertilizer (DANF) processing facility (see Mining Flash August 19), which itself was secured and upgraded as reported in Mining Flash August 11, 2014. The operational licence for the Santiago mine site is valid to August 2018. A Mining Permit for Santiago remains outstanding, and is expected shortly. Once this final permit is received, the Company will be fully permitted to commence production of DANF at Santiago.

See Haywood Securities for the full report – August 28, 2014

#### [Talon Metals Corp. \(TLO-T, \\$0.57\) – Talon Sinks its Claws into High Profile Nickel Project Option](#)

**Stefan Ioannou, PhD** | [mcarew@haywood.com](mailto:mcarew@haywood.com), **Evan Young, MS, DIC** | [eyoung@haywood.com](mailto:eyoung@haywood.com)

- Talon has been focussed on its Trairão iron ore project in Brazil. In late June, the Company also entered into a definitive agreement with Kennecott Exploration Company, part of the Rio Tinto Group (RIO-ASX, not rated), to initially acquire a 30% interest in Kennecott's Tamarack nickel-copper-platinum project in Minnesota, with a further opportunity to acquire the remaining 70% under certain conditions. We view the agreement as a transformational move for Talon, which stands to position the Company with a significant interest in a high grade sulphide deposit poised to gain additional market recognition on the back of an anticipated global nickel supply deficit in mid-2015 stemming, in part, from this year's Indonesian export ban.

See Haywood Securities for the full report – August 29, 2014

### Other News

**Fission Uranium Corp. (FCU-V, \$1.20)**

**Share Price: (52-week high/low: \$1.73/\$0.59)**

**Daily Average Volume for the Week: 2.48 million**

**Market Capitalization: \$420 million**

**Shares Outstanding: 353 million**

**Cash: \$26 million (June 30, 2014)**

**Debt:** -

**Date of Release:** August 26, 2014

Event: Fission released results from 7 additional drill holes from its Patterson Lake South Project in Saskatchewan

Notable Results: Highlights include PLS14-271 (line 510E), which returned a total of 103.00 metres composite mineralization over a 146.0 metre section (between 57.5 metres and 203.5 metres), including 10.45 metres total composite "off-scale" (greater than 10,000 cps) radioactivity.

Comments: The latest drill results from Fission continue to expand the current uranium mineralized zones at PLS. We await additional results soon, in addition to a maiden resource estimate for PLS, due at the end of 2014.

**NexGen Energy Corp. (NXE-V, \$0.51)**

**Share Price:** (52-week high/low: \$0.65/\$0.22)

**Daily Average Volume for the Week:** 10.8 million

**Market Capitalization:** \$88.6 million

**Shares Outstanding:** 170 million

**Cash:** \$13 million (July, 2014)

**Debt:** -

**Date of Release:** August 26, 2014

Event: NexGen released results from one drill hole from its Arrow Zone in Saskatchewan

Notable Results: AR-14-30 intersected 186.90 metres total composite mineralization including 53.85 metres of off-scale radioactivity (>10,000 cps) within a 287.7 metres section (from 298.3 metre depth to 586.0 metres). The composited "off-scale" intervals noted above include continuous "off-scale" intervals of 5.9 metres (from 537.3 metres depth), and 7.75 metres (from 548.55 metres depth). AR-14-30 was still in progress at 637.4 metres depth at the time of the press release.

Comments: Drill hole AR-14-30 is the first vertical hole at Arrow, and is targeting the extents of high grade mineralization encountered in AR-14-15 (august 7th, 2014 press release), which assayed 3.42% U3O8 over 22.35 metres from 564.00 metres depth, and 1.52% U3O8 over 32.00 metres from 594.00 metres depth. We await additional results from NexGen's summer exploration program.

**ATAC Resources Ltd. (ATC-V, \$0.83)**

**Share Price:** (52-week high/low: \$1.73/\$0.52)

**Daily Average Volume for the Week:** 2.19 million

**Market Capitalization:** \$95.4 million

**Shares Outstanding:** 118 million

**Working Capital:** \$24 million (August, 2014)

**Debt:** -

**Date of Release:** August 26, 2014

Event: ATAC released drill results from its Conrad, Sunrise and Anubis Zones, which form part of its Rackla project in central Yukon

Notable Results: Highlights from the Conrad Zone include hole OS-14-227, which returned 30.79 metres grading 9.50 g/t gold from a downhole depth of 452.8 metres. The hole represents a step-out to the south of previous holes drilled in the Conrad Lower Zone. At Sunrise, hole OS-14-225 returned 15.85 metres grading 2.03 g/t gold from a downhole depth of 190.5 metres and 12.19 metres grading 3.09 g/t gold from a downhole depth of 319.13 metres. Both holes reported here from Sunrise were drilled to the

west of the currently defined gold mineralized area; Hole OS-14-225 represents has increased expanded the gold mineralized zone by approximately 100 metres to the west.

Comments: These new drill results have expanded the gold mineralized zones already identified at Conrad and Sunrise. The Company will continue to drill to expand these gold mineralized zones throughout the rest of its 2014 drill program.

## HAYWOOD RESEARCH: THE WEEK IN REVIEW

Publications from the Haywood Research team for the week included the following:

- An annulment of a 2% NSR from **Asanko Gold Inc. (AKG-T)**
- High-grade silver drilling results from **Endeavour Silver Corp. (EDR-T)**
- An updated resource estimate from **Fortuna Silver Mines Inc. (FVI-T)**
- A maiden mineral resource estimate from **Highland Copper Company Inc. (HI-V)**
- FY'14 financial results from **Paladin Energy Ltd. (PDN-T)**

## RADAR FLASHES

### [Asanko Gold Inc. \(AKG-T, \\$2.49\) – Goknet 2% NSR on AGM Phase I Annulled: Heightens Future Margins](#)

**Geordie Mark, PhD** | [gmark@haywood.com](mailto:gmark@haywood.com), **Benjamin Asuncion** | [basuncion@haywood.com](mailto:basuncion@haywood.com)

- A settlement agreement with Goknet Mining (private Ghanaian company) outlines the acquisition of their 2% NSR on Phase I of the Asanko Gold Mine (AGM) in exchange for cash (undisclosed amount), 1.0 million shares of AKG, and two exploration projects (Kubi & Diaso) in which we attribute no value. Reduction of the encumbrance of the 2% NSR on Phase 1 production is deemed to be a net positive not only on a NAV basis, but also creates a marginally financially stronger operation as it heightens future cash flows and operating margin that translates to Phase 1 production being a lower risk option that becomes more attractive for potential acquirers. The Agreement is still subject to certain conveyances, which ultimately are expected to be completed in due course.
- With the commencement of construction activities last week, we anticipate a steady pipeline of newsflow from Asanko as it progresses through construction and into production in H1/16. Progress updates from Phase I construction will be augmented with details of Phase II integration in the form of a scoping study anticipated early next year (Q1/15). We also expect a mineral resource estimate update, including a maiden resource on Dynamite Hill, in Q3/14.

See Haywood Securities for the full report – August 27, 2014

### [Endeavour Silver Corp. \(EDR-T, EXK-N; \\$6.04\) – Endeavour Continues to Intersect High-Grade at San Sebastian](#)

**Benjamin Asuncion** | [basuncion@haywood.com](mailto:basuncion@haywood.com)

- Endeavour provided an update from the 2014 exploration program at its wholly-owned San Sebastian project in Jalisco State, Mexico. Drilling has continued to intersect high-grade silver-gold mineralization in the Terronera vein system, now defined over 1,400 metres along strike. Highlights from drilling included:
  - TR23-1: 126 g/t Ag and 4.02 g/t Au (360 g/t AgEq) over 12.8 metres (est. true width) in the Terronera vein
  - TR17-2: 435 g/t Ag and 0.59 g/t Au (469 g/t AgEq) over 6.6 metres (est. true width) in the Terronera vein
  - TR21-1: 99 g/t Ag and 4.22 g/t Au (345 g/t AgEq) over 7.5 metres (est. true width) in the Terronera hanging-wall vein

See Haywood Securities for the full report – August 28, 2014

### [Fortuna Silver Mines Inc. \(FVI-T, FSM-N; \\$5.50\) – Trinidad North Drives Resource Growth at San Jose](#)

**Benjamin Asuncion** | [basuncion@haywood.com](mailto:basuncion@haywood.com)

- Contained silver-equivalent ounces within the M&I category increased by 44% or 19 Moz AgEq to total of 62 Moz AgEq at an average grade of 338 g/t AgEq. Contained silver-equivalent ounces within the Inferred category increased by 69% or 34 Moz AgEq totaling 83 Moz AgEq at an average grade of 363 g/t AgEq. Note that revised reserve estimates were not provided but current reserves have an average grade of ~300 g/t AgEq.

- Trinidad North was the largest driver behind the growth in resources at San Jose, accounting for 47 Moz AgEq of the 53 Moz AgEq increase. The updated Trinidad North resource included an additional 41 step-out and 12 infill drill holes from the H2/13-H1/14 drill program, extending the resource 200 metres to the north along strike. Trinidad North remains open at depth and along strike to the north, and drill testing of a further 250 metre extension along strike will commence in September 2014.

See Haywood Securities for the full report t – August 27, 2014

### **Highland Copper Company Inc. (HI-V, \$0.49) – Maiden NI 43-101 Compliant 543S Resource Estimate – Grade is King**

**Stefan Ioannou, PhD | sioannou@haywood.com**, Evan Young, MS, DIC | eyoung@haywood.com

- Highland is an advanced-stage developer in the Keweenaw region of Michigan's Upper Peninsula, which is home to a rich history of copper mining. The Company plans to consolidate four deposits into a 50/50 joint-venture partnership with AMCI Holdings Inc., which is considering a centralized processing facility and existing infrastructure to re-establish copper production in the region.
- Highland has tabled a maiden National Instrument 43-101 compliant resource estimate for the Company's 65% owned 543S copper deposit. The estimate, completed by G Mining Services Inc., is headlined by a 1.52 Mt indicated resource grading 3.27% copper and 5.1 g/t silver, and an additional 0.19 Mt inferred resource grading 3.08% copper and 4.8 g/t silver (based on a 1.9% copper-equivalent cut-off grade; 262 diamond drill hole data base [45,608 m]; 30.5 by 15.0 m grid). The estimate further demonstrates the potential high-grade tenor of Keweenaw's volcanic hosted deposits, which we consider a 'head grade sweetener' to Highland's significantly larger, lower grade sedimentary hosted deposits (i.e., White Pine and Copperwood).

### **Paladin Energy Ltd. (PDN-T, \$0.435; PDN-AU, A\$0.405) – FY`14 Results Neutral – Uncertain Strategy to Address November 2015 Debt Maturity**

**Colin Healey, MBA | chealey@haywood.com**

- Paladin released results for FQ4`14 and the full-year 2014 (ended 06/30/14).
- Results were in-line with expectations from the top down, given the bulk of the full-year and quarterly operating data, and sales were previously released in late July <See our Report Here>. The only unusual item not previously disclosed was a further US\$40.6 million in inventory write-downs for FQ4 based on current uranium price (\$61.7 million for the full-year), which were partially off-set by a \$41.9 million credit designated 'Impairment Reversal', in the Cost of Sales line.

See Haywood Securities for the full report – August 29, 2014

## **OTHER REPORTS**

---

### **Uranium Weekly – Strong Uranium Price Movement this Week (+5.2% since Monday) on Supply Risk**

**Colin Healey, MBA | chealey@haywood.com**

- Uranium Participation Corp's (U-T) significant Fund Implied Price premium to the BAP uranium price contracted significantly this week, falling from ~16% Monday to just 11% calculated at Thursday night's UxC Broker Average Price of \$33.00/lb U3O8, as U-TSX shares witnessed little movement throughout the week and the BAP rose 5.2% from \$31.38/lb Monday. The premium is based on our calculated Fund Implied Uranium Price of uranium of \$36.74/lb U3O8 Thursday night (calculated at BAP uranium price of \$33/lb U3O8, and a U-TSX closing price of C\$5.25, see below

and page 4 for complete details). As shown in the graphic above, the equities have not had a big response to recent uranium price strength as yet, and remain well off their March peaks. Below, we note that as of last week, the U-TSX FIP was reflecting a price ~equal to that of the October 2016 NYMEX uranium futures price. This date has shifted forward significantly in just one week, as the strip shifted up materially week-over-week (see page 5), and the current FIP now crosses the futures curve in ~March 2016.

See Haywood Securities for the full report – August 29, 2014

## MARKET ESSENTIALS

### Companies in the News

- **Imperial Metals (III-T)** announced that it is on the verge of commencing production at its Red Chris copper and gold mine in British Columbia, once a power line is completed in September. The announcement comes off the back of the massive mine waste spill at its Mount Polley mine earlier this month. The Company also stated that it would review the tailings facility via a third party chosen by the Tahltan Central Council (TCC). Red Chris, in northwest B.C., is located near the Iskut River, a major tributary of the Stikine River, which ends in southeast Alaska and it is considered one of the largest salmon habitats in the Tongass National Forest.
- **Barrick Gold (ABX-NYSE)** announced that it has dismantled its corporate development team in a further move to reduce costs. It will be replaced by a Business Development team, which will focus on efficiencies associated with its current operations, the Company stated. The corporate development team was focused on identifying and evaluating assets for purchase.
- **Glencore (GLEN-LON)** announced it has sold its 75% stake in the Donkin coal project in Canada to U.S.-based Cline Group. Canadian junior Morien Resources (TSX-V:MOX) owns the remaining 25% of the project, and cleared the way for the new operator as it announced it was waiving its right of first refusal to acquire the controlling interest in the mine. Morien and Glencore have invested \$43 million in the fully permitted Donkin project since 2006. Donkin, located less than 30 km from the deep water port of Sydney, Nova Scotia, is estimated to have reserves of at least 480 million tonnes of coal.
- **Newmont Mining (NCM-NYSE)** announced that it has withdrawn the international arbitration filing against the Indonesian government which the Company originally filed after the government imposed its ore export ban earlier this year. The withdrawal came on the back of warnings from the Indonesian government that it would withdraw the Company's mining licence if the litigation was pursued further. The two parties have reportedly reached an agreement on new mining rules and the CEO, Mationo Hadiantom, stated he expected operations to resume at its Batu Hijau copper mine "soon".
- **Cameco Corp. (CCO-T)** announced on Wednesday that it is halting production at two of its Saskatchewan operations: MacArthur River uranium mine (the world's largest) and the Key Lake mill, after workers announced they were intending to strike on Saturday. Employees at both operations have been without a contract since Dec. 31, 2013.
- **Lucara Diamond Corp. (LUC-T)** announced that it will tender a 204 carat diamond extracted from its Karowe Mine in Northern Botswana. This is on top of an additional 6 Type 2A diamonds of greater than 100 carats.

### Financings

- **Peregrine Diamonds (PGD-T)** announced a rights offering to raise ~US\$15.1 million. Net proceeds from the financing would be used to fund the summer field and bulk sampling program at Chidliak, and to make the final payment of \$2.5 million to BHP Billiton.
- **MBAC Fertilizer Corp. (MBC-T)** announced that it has executed the previously announced R\$40 million (approximately US\$18.2 million) working capital facility with Banco Santander Brasil S.A. and has received final approval for a 24-month debt extension from all of its senior lenders.

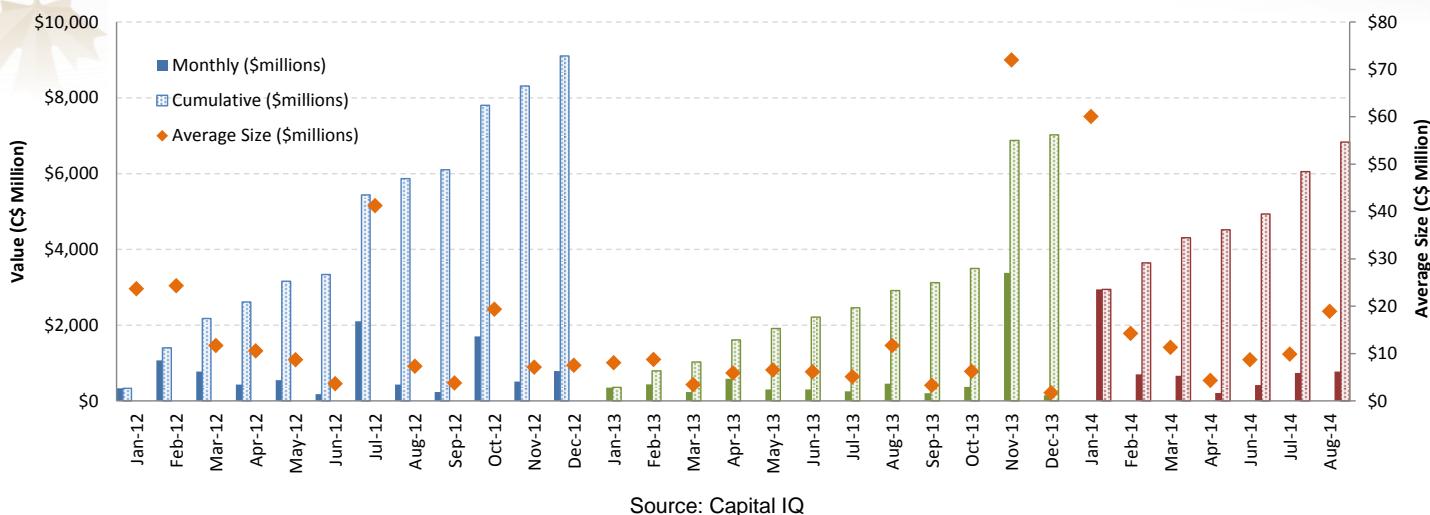

Under the terms of the final approval for the Senior Debt Re-Profiling, the Company will be permitted to defer the repayment of principal and interest until September 15, 2016.

## Mergers and Acquisitions

- **Mirasol Resources (MRZ-V)** announced it signed the definitive Option and Joint Venture Agreement with its partner, First Quantum Minerals (FM-T) for the exploration and development of its 100%-owned, 13,659 hectare Rubi Property, located in the El Salvador copper-gold mining district of Region III, northern Chile.

## COMMODITIES AND ETFS: A WEEK IN ACTION

### Gold - 1-Year US\$/oz (left) and Total ETF Holdings (right)

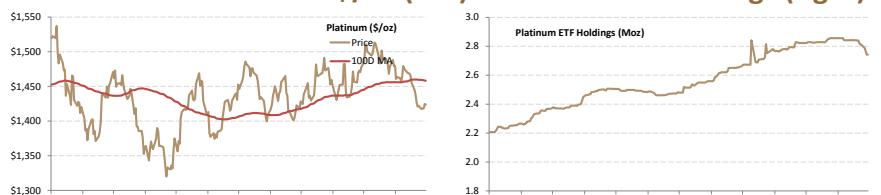

- Spot: Gain (+0.5%) for the week
- ETF Holdings: 55,518,308 ounces, down 179,262 ounces for the week

### Silver - 1-Year US\$/oz (left) and Total ETF Holdings (right)

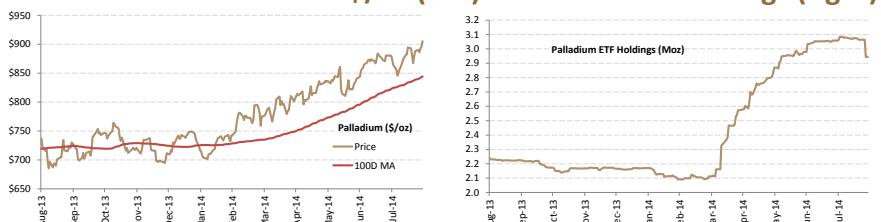

- Spot: Gain (+0.2%) for the week
- ETF Holdings: 636,889,979 ounces, up 1,556,579 ounces for the week

### Platinum - 1-Year US\$/oz (left) and Total ETF Holdings (right)

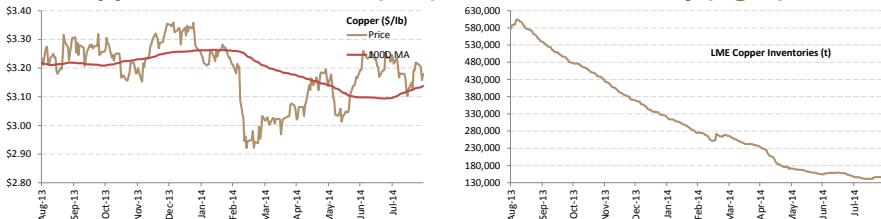

- Spot: Gain (+0.1%) for the week
- ETF Holdings: 2,742,317 ounces, down 73,587 ounces for the week

### Palladium - 1-Year US\$/oz (left) and Total ETF Holdings (right)

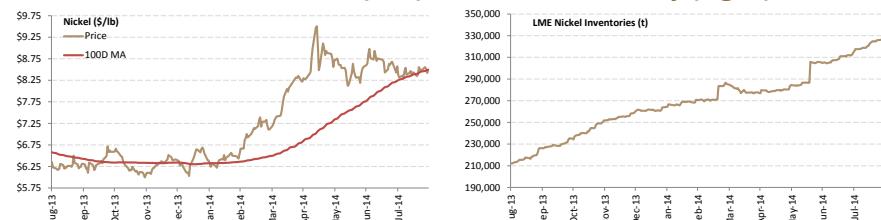

- Spot: Gain (+1.8%) for the week
- ETF Holdings: 2,943,009 ounces, down 121,140 ounces for the week

### Copper - 1-Year US\$/lb (left) and LME Inventory (right)

- Spot: Gain (-1.3%) for the week
- LME Copper: 148,150 tonnes, up 1,725 tonnes for the week

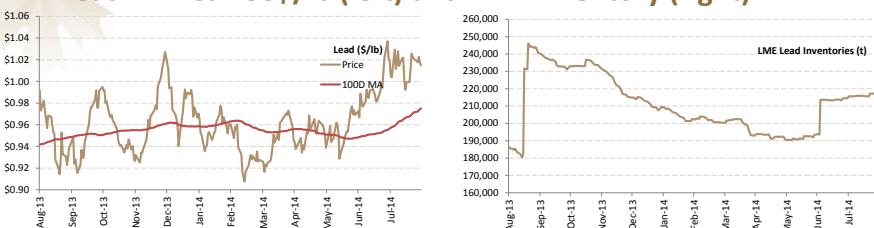

### Nickel - 1-Year US\$/lb (left) and LME Inventory (right)

- Spot: Loss (-0.26%) for the week
- LME Nickel: 329,136 tonnes, up 4,422 tonnes for the week

### Lead - 1-Year US\$/lb (left) and LME Inventory (right)

- Spot: Loss (-0.8%) for the week
- LME Lead: 220,550 tonnes, up 3,350 tonnes for the week

### Zinc - 1-Year US\$/lb (left) and LME Inventory (right)

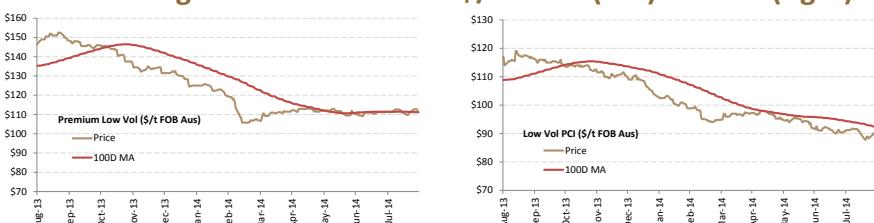

- Spot: Loss (0.0%) for the week
- LME Zinc: 734,350 tonnes, down 850 tonnes for the week

### Iron – 1-Year US\$/t 58% Fe (left) and 62% Fe (right)

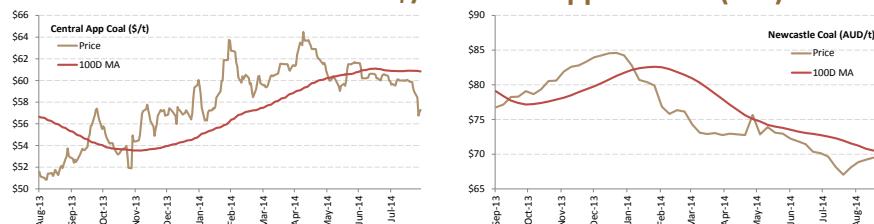

- 58% Fe Ore: Loss (-3.5%) for the week
- 62% Fe Ore: Loss (-2.4%) for the week

### Metallurgical Coal – 1-Year US\$/t Platts (left) and PCI (right)

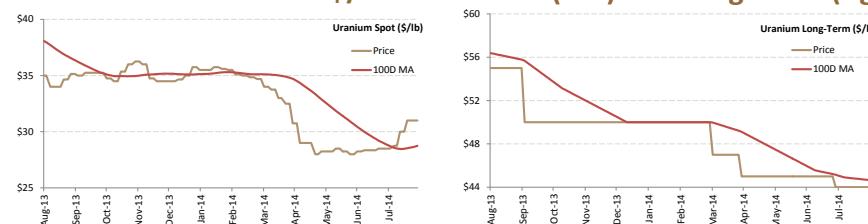

- Premium Low Vol: Gain (+0.5%) for the week
- Low Vol PCI: Gain (+1.8%) for the week

### Thermal Coal – 1-Year US\$/t Central Appalachian (left) and Newcastle (right)

- CAPP Futures: Loss (-3.0%) for the week
- Newcastle Thermal Spot: Gain (+0.4%) for the week

### Uranium – 1-Year US\$/lb Short-Term (left) and Long-Term (right)

- Uranium Spot: Gain (+4.3%) for the week
- Uranium Long-Term: Unchanged

Other material conflict of interest of the research analyst of which the research analyst or member knows or has reason to know at the time of publication or at the time of public appearance:

- Haywood Securities Inc. pro group holdings exceed 10% of the issued and outstanding shares of Zazu Metals Corp. (ZAZ-T).

## Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

## Recommendation Rating

**BUY** – The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

**HOLD** – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

**SELL** – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in is expected to underperform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

**TENDER** – The analyst is recommending that investors tender to a specific offering for the company's stock.

**RESEARCH COMMENT** – An analyst comment about an issuer event that does not include a rating or recommendation.

**UNDER REVIEW** – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or

to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

**COVERAGE DROPPED** – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

## Overall Risk Rating

**Very High Risk:** Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

**High Risk:** Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

**Medium-High Risk:** Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital

**Moderate Risk:** Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.

## Risk Profile Parameters – Mining and Minerals Sector

**Forecast Risk: High (7-10)** – The Company's primary project(s) is at an earlier stage of exploration and/or resource delineation whereby grades, tonnages, capital and operating costs, and other economic/operational parameters are not yet reliably established. **Moderate (4-6)** – The Company has taken steps to de-risk its primary producing, or soon to be producing project(s) and has established reasonably reliable operational and economic parameters. **Low (1-3)** – The Company has de-risked the majority of its primary project(s) through operational history and established production profile(s).

**Financial Risk: High (7-10)** – The Company's near- and medium-term (capital) expenditure considerations, including the current year or next forecast year, are not fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations—successful project execution depends, in part, on future (equity) financing(s). Existing and/or forecast levels of leverage are above average relative to the Company's peer group. The risk of a significant capital cost overrun(s) is high given the early stage of project development. **Moderate (4-6)** – The Company's near-term (capital) expenditure program, in the current year or next forecast year, is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Medium-term funding requirements will likely require additional financing consideration, but should be achievable assuming no significant uncontrollable events impede access to capital. Existing and/or forecast levels of leverage are in-line with the Company's peer group. The risk of a significant capital cost overrun(s) is moderate given the advanced stage of project development. **Low (1-3)** – the Company's near- and medium-term (capital) expenditure program is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Existing and/or forecast levels of leverage are below average relative to the Company's peer group.

**Valuation Risk: High (7-10)** – The current valuation is at a premium to peers. The valuation reflects considerable future exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the "DCF" evaluation by more than 50%. **Moderate (4-6)** – The current valuation is within historic ranges and generally consistent with

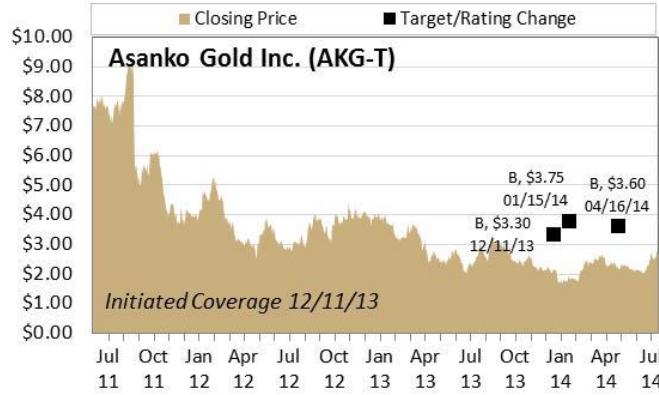

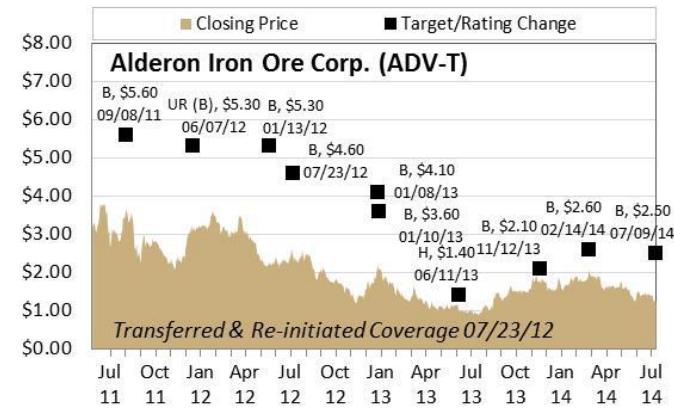

peers. The valuation reflects reasonable exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by 15% to 50%. **Low (1-3)** – The current valuation is at the low end of historic ranges and at a discount to peer valuations. The valuation reflects limited new exploration success and no commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by less than 15% or falls below the current market value.

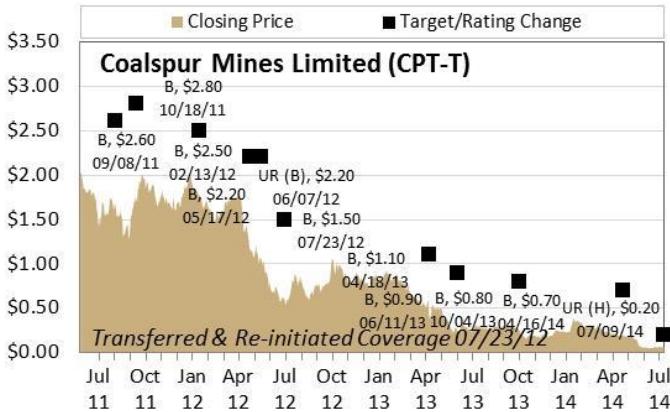

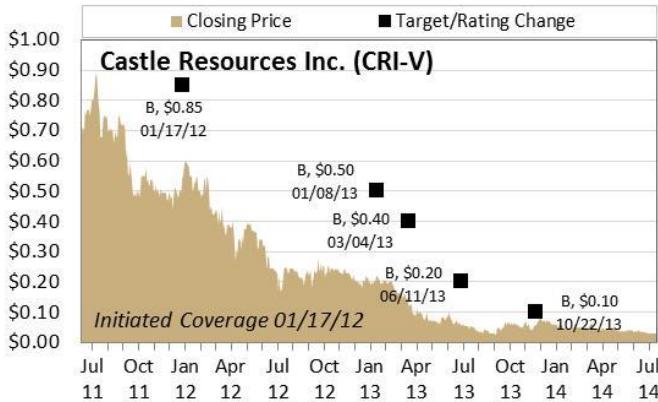

**Political Risk: High (7-10)** – Obtaining permits is challenging. Properties are located in an area(s) with high geo-political uncertainty, limited access, and/or have significant new infrastructure requirements. **Moderate (4-6)** – Properties are located in an area(s) with moderate geo-political risk, reasonable or manageable access, and some established infrastructure. **Low (1-3)** – Properties are located in areas with a manageable geo-political risk profile and established access/infrastructure.

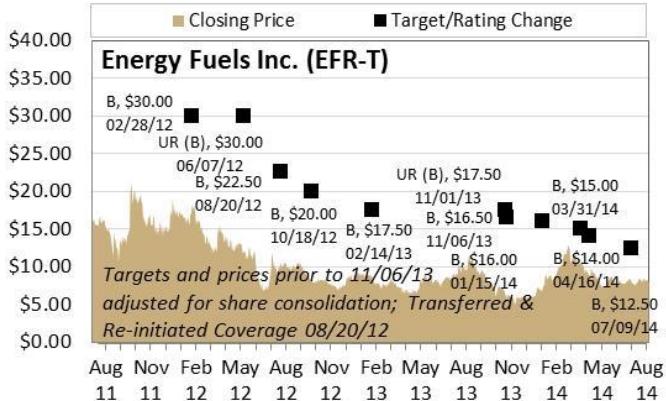

## Distribution of Ratings (as of September 2, 2014)

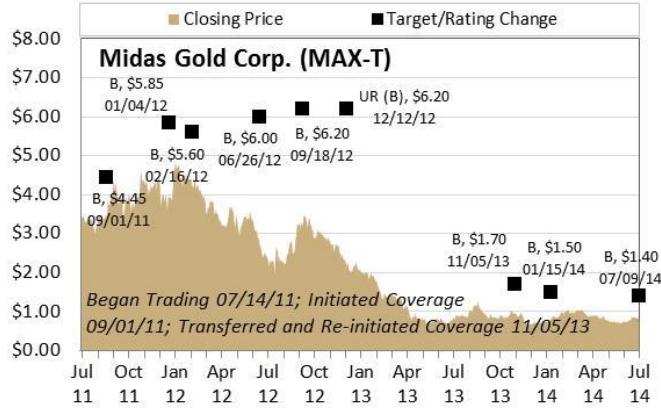

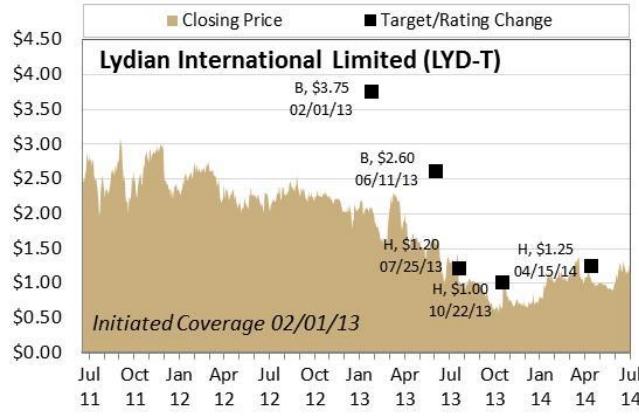

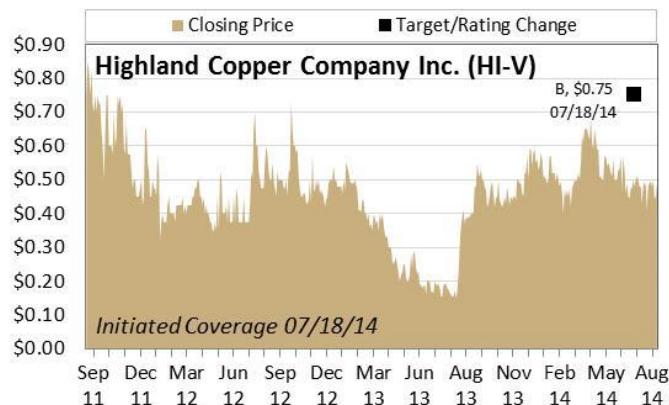

|               | Distribution of Ratings | IB Clients |       |
